

IRFAN AHMED
IT Field Engineer | Electrical & Site Project Engineer
Lombard, IL, USA
407-403-8853
470-647-6376
engineerirfan21@gmail.com
Work Authorization: U.S. Citizen

PROFESSIONAL SUMMARY

Field-focused Electrical and IT Engineer with 10+ years of experience supporting electrical, IT, and OT systems in industrial, transportation, and facility environments. Proven ability to execute site and capital projects from planning through installation, commissioning, and handover. Strong hands-on experience in IT field support, SCADA and control systems, electrical power infrastructure, system monitoring, and troubleshooting. Known for working independently in the field, resolving incidents quickly, and minimizing operational downtime.

CORE ENGINEERING & IT FIELD SKILLS

- IT Field Support & On-Site Troubleshooting
- SCADA, OT & Industrial Control Systems
- System Monitoring, Incident Response & Uptime Support
- Networked Field Devices, Control Panels & Interfaces
- Electrical Power Distribution (480V and below)
- Medium-Voltage Coordination (up to 12kV – utility interface)
- UPS, Switchgear & Control Panels
- Equipment Installation, Commissioning & Startup
- Field Troubleshooting & Root-Cause Analysis
- Contractor, Vendor & Site Coordination
- Capital & Facility Projects Support
- Construction Drawings & Technical Documentation
- Life-Safety Systems (Fire Alarm, Emergency Power)
- Preventive & Corrective Maintenance
- Site Safety, Lockout/Tagout, Risk Assessments

PROJECT & FIELD ENGINEERING EXPERIENCE

- Executed site and capital projects involving electrical systems, IT/OT infrastructure, and field equipment
- Supported IT systems, SCADA platforms, and utility infrastructure for new equipment and system upgrades
- Installed, tested, commissioned, and supported field devices, control panels, and supporting IT systems
- Performed field measurements and verification of electrical, control, and networked equipment
- Supported system startup, monitoring, troubleshooting, and stabilization in live environments
- Responded to field incidents and system faults to restore services and maintain uptime
- Coordinated contractors, vendors, and internal teams to minimize operational impact
- Maintained technical documentation, system records, and site reports

Operations, Maintenance & Electrical Project Engineer

Atlanta Airport SkyTrain (APM System) — Atlanta, GA Jan 2021 – Present

- Supported capital improvement, site engineering, and system upgrade projects across electrical, IT, and facility systems
- Coordinated installation, commissioning, and startup of electrical, electromechanical, and control systems
- Performed field inspections, measurements, and verification of equipment, panels, cabling, and utilities
- Troubleshot electrical, control, and system faults to restore service and reduce downtime
- Coordinated contractors, vendors, and internal operations teams to execute work safely in live environments
- Reviewed drawings, specifications, and maintenance documentation to ensure compliance with codes and standards
- Maintained project records, schedules, permits, and technical documentation within MMIS
- Supported SCADA systems, availability reporting, downtime analysis, and preventive maintenance planning
- Supported multiple concurrent field projects while maintaining uninterrupted passenger operations
- Supported field IT and control systems, including system monitoring, fault diagnosis, and uptime-critical incident response
- Worked with SCADA, control networks, and site systems to support reliable operations and system availability

Electrical Engineer (Site & Field Operations)

JUPITER EMC LLC — Abu Dhabi, UAE Jan 2017 – Dec 2019

- Supported site installation and maintenance of electrical and lighting systems
- Read, interpreted, and executed work based on construction drawings and specifications
- Coordinated site activities, contractors, and safety requirements
- Prepared work method statements, risk assessments, and technical reports
- Supported compliance with safety regulations and site procedures
- Assisted with inspections, approvals, and handover documentation

Electrical Engineer (Fire & Life-Safety Systems)

TGCSS LLC — Abu Dhabi, UAE Jan 2015 – Jan 2017

- Installed, tested, and maintained fire alarm and firefighting systems
- Performed electrical acceptance testing, continuity testing, and insulation testing

- Supported field troubleshooting and corrective maintenance activities
 - Acted as a site safety resource, ensuring compliance with safety procedures
- Electrical Engineer (Facilities & Infrastructure)

EMRILL Services LLC — Abu Dhabi, UAE Jan 2012 – Jan 2015

- Installed, tested, and maintained LV panels, SMDBs, and DBs
- Installed and maintained transfer, booster, and sump pump systems
- Supported facility electrical systems, fire detection, and emergency power
- Performed testing, commissioning, and maintenance of electrical infrastructure

EDUCATIONMaster of Science in Computer Science Engineering

Merrimack College — North Andover, MA

Bachelor of Science in Electrical Engineering

Hajvery University — Lahore, Pakistan

TOOLS & SYSTEMS

- SCADA Systems
- MMIS / CMMS
- Electrical Test Instruments
- Field Tools & Measurement Equipment
- IT & Control Interfaces
- Incident response, system monitoring, and uptime-critical support
